

## Assessing the effectiveness of the BCP process

### Why you should attend

- As the current global pandemic demonstrates , the likelihood of a severely disruptive event has never been more evident
- Given the pace with which global threats evolve, incidents such as cyber-attacks, flooding, terrorism, supply chain failures and epidemics are increasingly likely.
- Recognising these potential crises at an early stage, and effectively dealing with such events requires a very robust BCP process.
- Being able to review the BCP process in a comprehensive manner will help all businesses to be more crisis resilient — and better prepared to deal with incidents as they occur.

### Attending this webinar will help you to

- Review and update the BCP plans
- Assess the resilience of critical business processes
- Develop plans for each critical incident
  - Explosions
  - Fire
  - Sabotage and terrorism
  - Supply chain failure
  - Inability to access offices
  - Flooding
  - Earthquake
  - Significant political change
  - Loss of IT
  - Loss of critical data
  - Loss of Telecoms network
  - Electricity outage or loss of water supply
  - Epidemic
- Review the effectiveness of emergency preparedness
- Evaluate the BCP communication process
- Assess the effectiveness of BCP testing
- Re- evaluate the recovery planning approach
- Enhance the effectiveness of post event reviews

### CPE credits

- Participants will receive a certificate of attendance and will earn 2 CPE credits in the Auditing field of study.
